

8 - 32 zone integrated security panel / Generic model

ATS1000

ATS1000 Control Panel

The ATS1000 is an integrated alarm & access control panel and features 8 programmable zones and is expandable up to a maximum of 32 zones with on board 1 x ATS1202 input expander or external by Data Gathering Panels like ATS1201.

It can be programmed to operate as 2 independent alarm systems (areas). An optional plug-in ISDN interface ATS7120 provides a secure Euro ISDN connection. Reporting formats like SIA, X-SIA, Contact ID, etc are available.

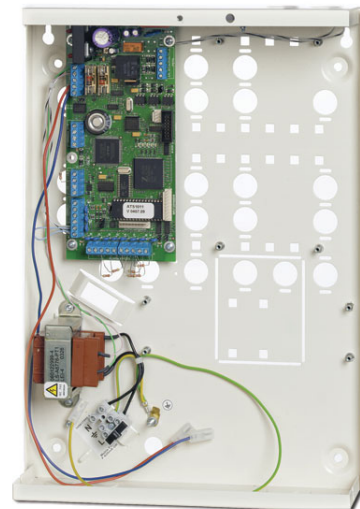

Specifications

System split (areas)	2
Inputs on board	8
Max. inputs in database	32
ATS1202 on board	Optional / 1
Outputs on board	Internal & external siren
Max. number of OC outputs (on unit)	255
Remote Arming Stations	4/16*
Data gathering panels	15
Alarm groups	74
Standard doors on control panel	4/16*
Intelligent doors on 4-Door controllers	0
Door groups	10
Floor groups	
Users (cardholders)	50
Users with name	50
4 to 10 digit pin codes	50
Alarm events in the log	250
Access events in the log	10
Specified cable	WCAT 52/54 or equivalent
Power supply	13.8 VDC / 0.7 A
Operating temperature	-10 to +55°C
Mains transformer	230 V 50 Hz/19 VAC 15.2 VA
Housing dimensions (W x H x D)	315 x 388 x 85 mm

* with extra power supply
